Professional Summary

Senior Software Engineer and Technical Lead with 8+ years of experience building scalable web applications, SaaS platforms, and enterprise systems using React, Next.js, TypeScript, JavaScript, Python, and Django. Proven experience in software architecture, frontend and backend development, technical leadership, mentoring engineers, Agile/Scrum delivery, REST APIs, performance optimization, CI/CD, and cloud-based development. Strong track record of owning technical strategy, driving cross-functional initiatives, improving engineering standards, and delivering production systems from architecture through deployment.

Experience

Tech Lead

May 2026 – October 2026

Synchrony

Remote

- Owned architectural decisions and technical strategy for enterprise Next.js applications, driving scalable patterns and engineering standards across the team.
- Led and mentored engineers through complex initiatives, owning technical planning, code quality, execution, and cross-functional collaboration with product and design.
- Drove Agile delivery across Scrum and Jira, managing sprint planning, prioritization, dependencies, and execution to move high-impact initiatives from concept to production.

Senior Full Stack Engineer

June 2024 – May 2026

Disney

Lake Buena Vista, FL

- Built a scalable analytics platform for enterprise content forecasting using Next.js, Django, and Snowflake with component-driven frontend architecture.
- Developed complex state management with Jotai, Redux, and React Query for large-scale async data synchronization and real-time UI updates.
- Optimized web performance through profiling, Rollup tree shaking, Core Web Vitals tuning, and monitoring with Datadog and New Relic.
- Built internal data tools and visualization utilities using Streamlit for forecasting analysis and experimentation.
- Implemented end-to-end testing with Playwright and integrated CI/CD pipelines for production stability.

Lead Web Engineer

April 2023 – June 2024

MassVirtual

Orlando, FL

- Led full-stack development of a scalable LMS using Vue.js and Python with responsive design, modular components, and RESTful backend architecture.
- Designed secure authentication workflows and RBAC for military training systems and internal tooling.
- Reduced module deployment time from weeks to hours through workflow automation and platform improvements.

Lead Front-End Engineer

February 2021 – April 2023

SoSha

Remote

- Built and scaled a Next.js web platform with TypeScript, reusable component systems, and scalable state management (Redux).
- Drove 283% MRR growth and 733% daily engagement increase through frontend architecture and UX optimization.
- Optimized client-side performance and implemented subscription management to support rapid user growth.

Front-End Engineer

October 2020 – December 2020

Department of Defense (Externship)

Remote

- Developed a React Native mobile app for managing and assigning work orders across buildings and bases.

Team Lead

October 2019 – July 2020

Bloom Institute of Technology

Remote

- Mentored 10+ students through code reviews and technical coaching on React, Node.js, and modern JavaScript frameworks.

Projects

FinanceFlow

2025 – Present

financeflow.dev

Creator & Full Stack Engineer

- Architected and deployed a production SaaS financial analytics platform using Next.js and TypeScript with SEO optimization and Core Web Vitals tuning.
- Implemented WCAG 2.1 accessibility standards with Axe and Lighthouse, secure authentication (OAuth/RBAC), and Stripe billing infrastructure.
- Integrated third-party financial APIs and built RESTful backend services with PostgreSQL using Prisma and Drizzle ORM.
- Stack: Next.js, React, TypeScript, PostgreSQL, Prisma, Drizzle, Firebase, Stripe, OAuth, RBAC, CI/CD

Tesla USB Manager

2026 – Present

github.com/FrancoisCoding/tesla-usb-manager

Creator & Developer

- Built an open-source desktop utility for Tesla USB drive preparation, audio conversion via FFmpeg, and light show extraction using Rust and Tauri.
- Set up CI/CD with GitHub Actions for automated Windows builds (.exe, .msi, portable .zip) with SHA-256 checksums on semantic version tags.
- Stack: Rust, Tauri, TypeScript, Vite, Vitest, GitHub Actions, FFmpeg

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Redux, Jotai, React Query, Vue.js, Framer Motion, GSAP
Accessibility & SEO: WCAG 2.1, Axe, Lighthouse, Semantic HTML, Core Web Vitals, SEO Optimization, Open Graph, Structured Data
Backend: Django, Node.js, Express, Fastify, REST APIs, Microservices
Databases & ORM: PostgreSQL, Snowflake, MongoDB, Firebase, Supabase, Prisma, Drizzle ORM, SQL
Authentication: OAuth, JWT, Role-Based Access Control (RBAC)
Cloud & DevOps: AWS, Azure Gov Cloud, Docker, CI/CD, GitHub Actions, GitLab CI, Vercel
Monitoring & Observability: Datadog, New Relic, Splunk
Testing: Playwright, Jest, Cypress, Vitest, End-to-End Testing
Data & Analytics: Streamlit, Data Visualization, Performance Optimization
Tools: Git, GitHub, GitLab, JIRA, Confluence, Figma
